Attn: Keith Thomas, President

Dear Keith,

I am pleased again to write to you for your use with any who are interested in a reference regarding your performance on construction projects for the Church. This letter is in specific reference to the Willow Park project.

In renovation projects it is typical for us to encounter conditions that were not foreseen. We appreciate very much the work done to help us address these problems. The site management was excellent and very responsive to any concerns that we raised. The project was completed on schedule and with only one brief interruption in our use of the building.

We have with all of the project work you have done for us, including this project, been so grateful for the attention given to early completion, and have appreciated also the fairness that you demonstrate in working with us. Each project manager has been easy to work with and genuinely interested in the success of the project.

I would willingly discuss any specific inquiry from a prospective client. Thank you Keith.

Sincerely,

Jim Kyle, P.Eng
